Art Unit: 1794

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a composite.

Group II, claim(s) 6-10 and 13, drawn to a method for making a spin dope solution.

Group III, claim(s) 11 and 12, drawn to a fibers.

The special technical feature (STF) of group I is a composite material having a PPTA, nanotubes having an aspect ratio, diameter, and nanotube amount as recited by claim 1. On one hand, the STF is shown in the Prior art in the PCT search report provided by Applicant in EP 1336673 A1 and WO 03/080513 A, for example. There can be no Unity of Invention when the STF or single inventive concept is shown in the prior art. On the other hand, there is a Lack of Unity since the Process of group II is not specifically adapted for making the product composite of group I. See 37 CFR 1.475. Hence, Lack of Unity is held by the Primary Examiner under PCT Rule 13 and 37 CFR 1.475.

Any inquiry concerning this communication should be directed to Primary Examiner Edwards at telephone number 571-272-1521.
